

Regional Waste Management Workshop

Developed and Delivered as a partnership between MCDP, Saskatchewan Ministry of Environment, Saskatchewan Waste Reduction Council, and the Association of Regional Waste Management Authorities of Saskatchewan (ARWMAS)

The waste management workshop provides municipalities useful tools, experiences and regulations necessary to develop a regional waste management authority and regional landfill, and reduce waste within their communities and region.

MCDP and partners delivered the Regional Waste Management workshop in Duck Lake in June 2009. Thank you to the Town of Duck Lake for being a gracious host and to all the communities who attended.
